

What is CLR ✓

What is Manage code and unmanage code ✓

what is boxing and unboxing ✓

what is .net framework and .net core / Their difference ✓

what is sealed keyword ✓

what is abstract class and Interface ✓

what is namespace and assembly and their difference

what is Web Api ✓

GoHTTP methods in webapi ✓

features of webapi and mvc ✓

authentication and authorization

CORS and implementation of CORS

Annotation in Mvc

what is Mvc

Lifecycle of MVC

what is controller

how to implement web api in mvc

how to implement authentication in webapi

what is routing

MVC is Framework for building web Appl. using MVC
Controller → model
get data
data to view then it rendered
to HTML → response
It act as intermediate b/w model & view
all control goes to controller

Data Base .

Difference where and having clause

Difference delete and truncate

what is CTE

what is recurring queries

Difference function and store procedure

Difference Union and Union all

Diff between union and union all
Diff between truncate and delete

★ Pyramid program

Company: SnapWork

Difference between await async and parallel threading ✓

Diff between sleep and wait ✓

Diff between task and process ✓

What is lock in c# ✓

Ref and out keyword ✓

mvc

Default session timeout and how to change timeout

Unique identifier for object in c# ✓

Diff between encoding and encryption ✓

filters in MVC

Actionresult in mv and its details

Dependency injection

Viewbag, viewdetail and tempdata

What is razor in MVC

What is viewmodal

Entry point in MVC

Linq

These are some questions asked by team leads

Token based authentication

Different between post, get, put, etc ✓

Ado.net ke bare me kuch padh lena

Viewbag, viewdata and tempdata

Different ways to get 2nd highest salary dekh lena

Cookies, session, session types, how to secure cookies

Oops concept and api related dekha he na ✓

1. Early binding and late binding ✓
 2. Finalize() and Dispose() methods ✓
 3. Difference between `var` and `dynamic` keyword ✓
 4. SOLID principles
 5. What is the difference between DROP and TRUNCATE?
 6. What are Magic Tables in SQL Server?
 7. Commit and Rollback
 8. AJAX in Cloud (AJAX-cld)
 9. ViewState and Session
 10. Types of cookies
 11. ADO.NET
 12. Types of MVC routing concepts
 13. Session Management
 14. What are the different return types of a controller Action method?
 15. ActionResult and ViewResult
 16. What is Minification and Bundling?
 17. What is Run(), Use(), and Map() method in ASP.NET Core?
 18. What is the difference between middleware and filters in .NET Core?
 19. Dependency Injection in ASP.NET Core
 20. Describe the Service Lifetimes in Dependency Injection
 21. What is the sealed keyword in C#?
- 

22. UNION vs UNION ALL
23. How to delete duplicate rows in SQL Server?
24. How to optimize a Stored Procedure or SQL Query?
25. What are the main return types supported in Web API?
26. Explain error handling in Web API.
27. How can you configure JWT authentication in ASP.NET Core Web API?
28. How to register exception filters globally in ASP.NET Core?
29. What protocols are supported by Web API?
30. Consuming Web API
31. Collections in C# ✓
32. What is OOP (Object-Oriented Programming)? ✓
33. The 4 Pillars of OOP ✓
34. What are extension methods in C#? ✓
35. What is MediaTypeFormatter class in Web API?
36. Explain RenderBody and RenderPage in MVC

1. What is delegate ✓
2. use of delegate ✓
3. what is exception handling
4. what is finally
5. difference between async,await,promise and callback ✓
6. how to implement above
7. .net core and .net framework difference ✓
8. Abstract and Interface ✓
9. clustered and nonclustered indexes
10. write a query to count no of employee working in department

Company: Think future

- [13/12/2025, 17:15] Darshan Voda:
1. What is Abstraction ✓
 2. Can we have parameterized constructor in abstract class ✓
 3. How we call that abstract class constructor ✓
 4. What is interface ✓
 5. Can we implement 2 interface which have same method in one class ✓
 6. Var=10 then can we do var='abc' ✓
 7. Var and dynamic difference ✓
 8. What is action filters
 9. What is middleware
 10. How can we insert employee with correct department without foreign key relationship
 11. Authentic and authorisation question
 12. Which security you have used in your project
 13. Can we consume api in console application
 14. What is method overloading and method override
 15. We have same method name with same parameters but we pass as ref and out keywords will it work

Company Name: Knight Fintech

1. What is polymorphism
2. Benifits of polymorphism
3. can we create reference of parent class and object in inheritance and vise versa
4. Dependancy injection, use and benefits
5. how can we inject services in dotnet core

6. What is middleware

7. how can you call constructor of static class

1) What is early binding and late binding ✓

2) How you can use it - real example?

3) What is finalize and dispose ✓

4) What is abstract class and interface ✓

5) What is dependency injection

6) Explain Transit, scoped, singleton

7) how we can handle error

8) if there is any live issue happen how you can identify that issue on live

9) how you can secure web api

10) Write a linq left join

11) Write a query to delete duplicate records

12) Difference store procedure and functions

Company Name: Damco

1. How to create a project in angular

2. What is there in angular. Js file

3. Abstract class ✓

4. Abstract and interface ✓

5. Override and overridden ✓

6. Static class ✓

7. Type of constructor ✓

8. Inner and left join

9. Create table scenario based question user, playlist, song, playlistsongmapping

10. Question related to virtual keyword and inheritance like which method will call type questions

Company: EXL

1. What is CLR ✓
2. What is Const and readonly ✓
3. What is using keyword ✓
4. How to prevent class from inheritance ✓
5. What is async and await ✓
6. Can we use async without await ✓
7. Task and thead ✓
8. Can we have one try block and 2 catch block
9. Array and arraylist ✓
10. No swap problem
11. String reverse program
12. What is new keyword ✓

Company: UST

1. Ref and Out, why we use, when to use ✓
2. Oops ✓
3. How we achieve encapsulation and abstraction ✓
4. Middleware
5. Custom middleware
6. Get and put difference
7. Can we do insert and update in get ? What will happen
8. Rajesh is good boy reverse program with same position
9. Sql queries
10. What is extension method

Pending from above.

MVC - whole
authorization & authentication
Database
exception handling.
